Education

Iowa State University

Ames, Iowa

B.S. in Software Engineering, Minor in Data Science

May 2027 (Expected)

- Relevant Coursework: Data Structures and Algorithms, Software Development, Database Systems, Web Development, Data Science, Applied Data Modeling and Predictive Analysis, Embedded Systems and Microcontrollers (CPR E 2880), UNIX/Linux (COM S 2520), Linear Algebra, Probability and Statistics, Discrete Mathematics

Skills

Programming: Java, C++, C, C#, Python, JavaScript, TypeScript, SQL

Machine Learning & Data: PyTorch, scikit-learn, Pandas, NumPy, model training and evaluation, data cleaning, data quality review, data visualization, descriptive statistics, relational databases (MySQL)

Web & UI: React, Next.js, Tailwind CSS, HTML, CSS, responsive design, accessibility auditing

Systems & Tools: Linux, Git and GitHub, ServiceNow, Android Studio, Microsoft Office

Experience

Iowa State University, Department of Computer Science

Ames, Iowa

Head Teaching Assistant, COM S 1040 and COM S 1130

Jan 2026 – Present

Teaching Assistant, COM S 1040 and COM S 1130

Aug 2025 – Dec 2025

- Direct a team of 7–8 teaching assistants across 2 sections, scheduling coverage and aligning rubrics with instructors so that work graded by different people meets the same standard.
- Design AI-related programming assignments at the course instructor's request; assignments adopted into COM S 1040 for the Fall 2026 term.
- Evaluate TA performance reports, provide feedback on instructional quality, and review student submissions for correctness and consistency.
- Run labs, office hours, and grading for both courses, including Excel-based coursework in COM S 1130; advise students on debugging strategy and code quality.
- Create instructional videos to support students outside scheduled sessions.

Iowa State University Book Store, TechCyte Service Center

Ames, Iowa

Lead Technician (Aug 2024 – Sep 2025), Technician, Sales Associate

Aug 2023 – Sep 2025

- Supported Apple and Dell devices for a campus of 35,000 students and 5,000 faculty and staff as the primary repair facility on campus, with roughly 60 devices in the shop at any time.
- Diagnosed and repaired 1,250+ laptops, desktops, iPhones, and Apple Watches as an Apple- and Dell-certified technician, tracing hardware and software failures to root cause against defined service procedures.
- Reinstalled and upgraded operating systems, imaged devices, applied firmware and driver updates, and migrated user data as standard steps in endpoint servicing.
- Logged and maintained service records in ServiceNow and a shared tracking spreadsheet, tracking each device through diagnosis, parts ordering, repair, and customer follow-up.
- Ran daily operations of the service center, directing a team of student technicians, training new hires, and setting the service standards the team worked to.

Tech Solutions BD

Dhaka, Bangladesh

Software Engineer Intern

May 2024 – Jul 2024

- Automated recurring reporting workflows with Python scripts, organizing data so that users and managers could pinpoint anomalies more easily.
- Contributed to interactive dashboards used for small-business analytics.
- Integrated React frontends with backend services and wrote onboarding documentation so that other developers could work in the codebase without being walked through it.

Projects

CyCredit: Credit-Building Learning Game (SE 3090) | Java, Android Studio | Best Coder Award

- Built the frontend of a financial-literacy Android application in Java on a student team, implementing application screens and user interaction flows; the project finished among the top three across sections and earned the team's Best Coder award, voted by teammates.

Machine Learning and Predictive Modeling (Data Science coursework) | Python, PyTorch, scikit-learn

- Built and trained machine learning models on real datasets, evaluating performance and interpreting results.

Embedded Systems Development (CPR E 2880) | C, C++, C#

- Programmed microcontrollers and handled sensor input and output in a real-time embedded environment.

Relational Database Design (COM S 3630) | SQL, MySQL

- Designed relational database schemas and wrote SQL queries using joins, aggregations, and other relational operations to support data retrieval and reporting.

Exploratory Data Analysis (DS 2010/2020) | Python, Excel

- Cleaned, transformed, and analyzed datasets, applying descriptive statistics and data visualization to identify patterns and communicate findings to a non-technical audience.

Personal Portfolio Website | Next.js, TypeScript, Tailwind CSS

Summer 2026 – Present

- Building a responsive multi-page site with dynamic case-study routing and full light/dark theme parity; auditing contrast, focus states, and layout shift.
